

We're doing a lot of Business Development

Location: Munich, Full-time

Who we need at neurocare

- We are looking for you: An energetic, unique and international personality who shares our vision and can help drive our growth.
- Ideally, you will have experience in neuroscience, psychology or medical technology as well as feel at home in the field of finance and business planning.
- You will work closely with our Key Senior Executives in our regions and divisions to present well thought-out and coherent concepts to our CEO.
- You will develop project plans, financial and business models, discard, optimize and adapt them and always keep an eye on feasibility and results.
- In short: you are the extended arm of our founder & CEO, you form the driving and communicative foundation of our projects. You maintain an overview and are the link between the individual regions.

What sets you apart?

- You have successfully completed a degree in business and/or psychology or (neuro-) technology.
- You think globally, are committed to your goals, work with focus and never lose sight of the purpose and deadlines.
- Assertiveness and resilience are your daily hallmarks, yet above all a sincere passion for mental health as well as humor are paramount.
- You are equally fluent in German and English. Other languages are a plus.
- You have lived through many projects, "keeping many balls in the air at the same time", all while keeping a cool head.
- With all the drama and imperfection in the world around us, when you perform, you inspire with your

well-structured and coordinated plan from all sides, because it is solution-orientated and feasible.

You are important, so we offer you:

- A versatile job and responsibilities where your ideas are welcome.
- We focus on growth through innovation, so we also live an innovative corporate culture with flat hierarchies and room for personal growth.
- We reward your high level of commitment with performance-related remuneration. We agree fringe benefits on an individual basis.
- You will learn a lot about mental health and performance, about sleep, about the brain and stress - and therefore about regulating yourself.

neurocare empowers best practice by enabling personalised therapy for mental health. We already treat over 3500 patients p.a. in our own therapy centers and supply third parties with our technologies and services which are all part of our unique digital therapy platform. We are growing strongly.

neurocare has around 170 employees worldwide in the USA, the Netherlands, Australia and Germany. Our head office is in Munich. We offer innovative, sustainable and proven technologies and solutions and are vertically integrated. We not only help to alleviate symptoms, but also to achieve lasting and measurably better clinical outcomes for patients. We live our passion for innovation and are proud of our meaningful work for the benefit of people. If you want to make a difference, join our team!
